

# TNX-355

TNX-355 is a type of medicine called an entry inhibitor. Entry inhibitors work by preventing HIV from entering human cells.

## **HIV/AIDS-Related Uses**

---

TNX-355 is an investigational medicine that is not yet approved by the FDA for use outside of clinical trials. It is being studied for the treatment of HIV infection. This medicine does not cure or prevent HIV infection or AIDS and does not reduce the risk of passing the virus to other people.

## **Dosage Information**

---

TNX-355 comes in an injectable form. It is given through an IV into a vein.

## **Contraindications**

---

Individuals should tell a doctor about any medical problems before taking this medicine.

## **Possible Side Effects**

---

Along with its desired effects, TNX-355 may cause some unwanted effects. These side effects are not yet known. So far, limited studies in humans have reported no serious side effects with TNX-355.

## **Drug and Food Interactions**

---

A doctor should be notified of any other medications being taken, including prescription, nonprescription (over-the-counter), or herbal medications.

## **Clinical Trials**

---

For information on clinical trials that involve TNX-355, visit the ClinicalTrials.gov web site at <http://www.clinicaltrials.gov>. In the Search box, enter: TNX-355 AND HIV Infections.

## **Manufacturer Information**

---
